SUMMARY

Senior front-end engineer with 7+ years building enterprise software and customer-facing products. Specializes in React, TypeScript, front-end architecture, reusable component systems, accessibility and data driven interfaces.. Experienced owning complex features end to end, using AI-assisted development tools to improve planning and implementation and partnering across Product, Design, and Engineering.

SKILLS

Languages & Frameworks: React, TypeScript, JavaScript, Angular, HTML, CSS, PHP

Engineering: Front-End Architecture, Reusable Component Systems, REST APIs, Data Visualization, Accessibility, Unit Testing

Tools & Platforms: Git/GitHub, WordPress/CMS, Storybook, Figma, Jira, Cursor, Claude, CI/CD

EXPERIENCE

interos.ai | *Senior Web Developer*

SEPT 2025 - SEPT 2026

- Led front-end architecture and development for data intensive React and Typescript experiences, including interactive mapping, risk visualization and location management workflows.
- Designed and built reusable UI components using Storybook to develop, test and document component behavior across customer-facing experiences.
- Modernized the architecture of the Resilience interactive map experience, improving state management and application flow to improve UI performance.
- Built automated development and release workflows that improved deployment consistency, stakeholder communication and the reliability of weekly releases.
- Owned the company's customer-facing web platform end to end, including architecture, development, releases, integrations, accessibility, performance, and production support; also led the React/TypeScript rebuild and established more reliable deployment workflows.

Addison Group | *Frontend Web Developer (Contract, interos.ai)*

OCT 2024 - SEPT 2025

- Embedded with interos.ai as a contract front-end developer, building React-based features and reusable components across its customer-facing web platform.
- Improved responsive behavior, performance, and maintainability while partnering

- with Marketing and Engineering on feature delivery.
- Converted to a full-time **Senior Web Developer at Interos** in September 2025.

ZE Collective | *Freelance Web Developer & Digital Designer*

MAR 2024 - Present

- Design and develop custom responsive websites and CMS-driven experiences for small-business clients, balancing usability, maintainability, and visual polish.
- Partner directly with clients from requirements and design through development, launch, and ongoing improvements.

Vermeer | *Software Developer*

MAR 2022 - OCT 2023

Contracted through Twistthink

- Built front-end features for an enterprise dealer and customer portal using Angular and reusable web components.
- Developed shared components and patterns to reduce duplicated code and improve consistency and maintainability across the application.
- Partnered with architects, technical leads, and cloud engineers to implement UI/UX requirements and refine API integrations.
- Wrote unit tests covering more than 80% of contributed code and worked within an Agile delivery environment.

Mastercard | *Software Developer*

AUG 2019 - MAR 2022

Contracted through TDK Technologies

- Developed and maintained features for Mastercard's enterprise loyalty rewards platform using JavaScript, TypeScript, Angular, Java, Spring Boot, HTML, and CSS.
- Built, tested, and deployed customized forms, fields, and application functionality within a large enterprise codebase.
- Collaborated with senior and lead developers in an Agile environment to deliver and maintain production software.

EDUCATION

SavvyCoders

Front End Development, 2019

University of Missouri - Columbia

B.S., Fisheries and Wildlife Sciences, 2016
